

# COMING SOON

from the Muddy Views,

*"HAZE OF FUTURE PAST"*

A musical journey through the vagaries of air pollution assessment.

"Prolog"

*Oh murky veil that blocks our sight,  
Scatt'ring and absorbing light,  
NOx is brown and sulfate white,  
But we decide what's alright  
And what is pollution.*

*Unfettered views 'neath an azure sky  
Is the ideal we're guided by.  
But reality seems to fall quite short,  
Impelling our need for a new report.  
Let's form a committee with great speed  
To drive the studies that we think we need.*

Other selections: "Hope is a Feeling"  
"Enthusiasm Peaks Now"  
"Vegas Afternoons"  
"Oh, How Time Just Slips Away"  
"Knights of WHITEX' Kin"

"Epilog"

*Observe the source apportionment pie,  
Describing what obscures the sky.  
Emitting industries look and lament  
At all the lobbying money they've spent.  
Environmentalists gasp and yell "Foul!"  
Federal and state agencies scowl.  
Others decide to throw in the towel,  
Rent a houseboat and cruise on Lake Powell.*
