

Update on 2020 NEI plans for non-point Oil and Gas sector

J VUKOVICH

USEPA/OAQPS/EIAG

MARCH 30, 2021

Oil and Gas: 2020NEI plans

- ▶ Dependent on resources and timing (as always)
- ▶ Abandoned well emissions estimation
 - ▶ Planning to include in 2020NEI
 - ▶ Could be develop external from O&G Tool initially
- ▶ Gap-filling from Greenhouse Gas Reporting Program (GHGRP) and Greenhouse Gas Emissions Inventory (GHGEI)
 - ▶ Planning to include what is applicable in 2020NEI
 - ▶ Utah methodology to develop missing VOC emissions for pipeline pigging, pipeline fugitives, SSM/Blowdowns
 - ▶ Could be develop external from O&G Tool initially

Oil and Gas: 2020 NEI plans (2)

- ▶ HAP augmentation and other speciation updates are possible
- ▶ Acquiring 2020 activity data (e.g., HPDI) begins later this summer
- ▶ Further research possible on:
 - ▶ Quantifying capture efficiency for Tanks
 - ▶ Separate estimates for tribal activity assigned to tribal FIPS and not the state/county FIPS
